

# Peri-Implant Diseases

## Diagnosis, Treatment and Preventive Strategies

**Dr. Vinay Bhide**

**B.ArtsSc. (Hons.), D.D.S., M.Sc. (Perio.), F.R.C.D. (C)**

Dr. Vinay Bhide is a board certified Periodontist who provides the full scope of surgical periodontal and dental implant therapy. In addition to the conventional periodontal procedures such as pocket reduction and crown lengthening, Dr. Bhide has a special interest in esthetic and reconstructive periodontics; procedures involved include soft tissue grafting for correction of gingival recession, periodontal regeneration, and pre-prosthetic site development including alveolar ridge augmentation, maxillary sinus floor augmentation (both direct and indirect), and guided bone regeneration (GBR).

Dr. Bhide earned his DDS from the University of Toronto in 2001, and subsequently completed a one-year internship at Mount Sinai Hospital in Toronto. He completed his Master of Science and specialty training in Periodontology at the University of Toronto in 2005. Dr. Bhide is a Fellow of the Royal College of Dentists of Canada and Diplomat of the American Board of Periodontology. Dr. Bhide is also a member of the International Team for Implantology (ITI). Dr. Bhide has published several articles in peer-reviewed journals. Lastly, Dr. Bhide is also involved in didactic and clinical teaching of periodontics at both undergraduate and post-graduate levels and has lectured nationally and internationally on various topics related to Periodontology.

## Course Description

Perhaps no other field of dentistry has undergone as much growth in the past 2 decades than implantology. Dental implant therapy is considered to be the most predictable and successful means of replacing lost teeth. However, with the increasing number of patients being treated with dental implants, complications such as peri-implantitis have also been reported with higher incidence. What is a clinician to do when faced with the challenge of diagnosing and treating peri-implant mucosal inflammation and bone loss? This presentation will review the current concepts on the diagnosis of peri-implantitis and various treatment strategies which have been discussed in the literature. Emphasis will be placed on the etiology of peri-implantitis as understanding this is the key to effectively treating peri-implant disease. Although there is a lot that we don't know, this presentation will make clear what we do know and how we can apply this knowledge for the betterment of our patients!
